b4d347fde0

Minimum:

OS: Windows 7

Processor: AMD Dual Core 1.8GHz

Memory: 2 GB RAM

Graphics: Integrated Graphics

Storage: 150 MB available space

English

First of all I have to say that this is by far not a good game one of the main reasons might be that it's not offering much. Others would be: it becomes way too hard very fast and sometimes it feels laggy. The only reason I would give this a 4/10 is that I played a lot of total garbage shoot-em-up games on Steam and it would be unfair to give this a negative while it's just mediocre in my opinion and the price was quite fair.

Keep in mind that this is far from being a good game and there are a lot of better options out there.. Was waiting to review until I unlocked the second ship. So here is an overall review of the game:

PRO's:

PRICE (Well worth it)

The difficulty is well balanced and substantially gets harder after I unlock the second ship.

Love the explosions and variation of the explosion sounds

The background music is enjoyable, but I also love the mute option! haha

Always love when games put in the classic screenshake!

Enjoyed the multiple styles of ships ! I have only played with the first two but the second one is awesome!

CON's:

Lack of configuration options

Would love to see a global leaderboard and not just local

OVERALL

The game was a good fun fast paced shooter based in space with a mix of the classic and newer technologies with good explosions and sfx. Would love to see some more configuration options and more ships! Overall a great buy for a only \$0.99!

SUGGESTION

Buy if you like small fun shootemups that will keep you distracted for a couple hours for under \$1.00 on sale!

. So so... not great, not bad. Playable but not what I was looking for. I believe I bought it on 75% sale so no regrets. I would not recommend however because for about \$5 or less on sale you can get one of the many better arcade shooters..

Pilot Crusader is a steam videogame featuring unwittingly short forcibly gameplay with a bold 3 unlockable outer space pilots that is both crusading and miserable to dodge the red lazer bullet bullets that have an ancient tool to make you upset tremendously!

It's really short I beat this game in 19 minutes and it's like a dollar and it's still not worth your precious valuable time that uncovers the source of evil in your recovering soul!

I give this game a rough bad rating 6.0/10 it's not recommended

love the burrito master!!!. I can make you a better game with Scratch in one hour.. This game at first I was pumped for, but after I played it I found a number of bugs.

Every time you blow up an enemy, there is a giant white box. Bug down.

Sometimes the Mothership doesn't spawn in, and forces you to lose the streak.

There is no way to tell how to unlock more ships.

The AI and Ships in here are simply way too fast and your cannons are weak, and you can get killed with a single hit.

Simply not recommended, they have Refunds for a reason.
