About This Game

Push Pull is a challenging 2D puzzle game. You play as Push and Pull, and must work together through a series of simple looking, yet challenging puzzles in an unknown test facility. Will you persevere and discover what purpose this testing serves? Includes over 40 levels and multiple puzzle mechanics.

Important Notes for Co-op (Shared Screen):

Push Pull was designed as a single player game. However, as you control two characters the majority of the game could be played as a shared screen co-op game.

Title: Push Pull

THIS SO GOODDDDDDDDDDDDDDDDDDDDDDDDDDDDD!! P.S. I am reallt good withe the greasy wizard. A great looking locomotive with genuine sounds, all sadly let down by a lacklustre horn. The wipers are also setup wrong, as on the real life loco's they operate from left to right on the driver side and vice versa for the secondman. The braking system is very bizarre too and actually takes some getting used too, but once that is all out of the way, it is a good locomotive to drive and a great AI locomotive for scenarios.. pinnacle of gaming art and music is brilliant, love the song that goes beep boop beep for 5 seconds tin boy is my favorite character i bet he can beat goku and superman

yeah this game wow man definetly mindblowing

2/10

. I got a little sick on this one, and aiming a slow projectile from a moving coaster is kinda difficult. It's worth the money though - it's an inexpensive ride\game that works if you can stomach it.

Not my favorite VR experience but it's fun, and inexpensive.. I enjoyed the game, short as it was. I wouldn't mind seeing this game be expanded upon, much like other games on Steam have been. I do wish there was more to the game though. Perhaps equipment, for example. That being said it was a nice experience. I look forward to seeing more by the developer. Also, I enjoyed how it was ported for Mac. I find that, despite it being a relatively simple process to do, not many people port their RPGMaker games to Mac. I understand for more complex games in different engines, but in my experience 8-9 times out of 10 I can get RPGMaker games to work using Wineskin, which is a popular medium for porting RPGMaker games. So good on you Yitz.

Very Fun game. Can I pay to get this off of my Games list?. This is most unoptimized, bad looking game I have ever played next to Agricultural Sim. Do not buy. Buy Farming Sim 2013 instead.. Already had the sex with 30 different girls since I bought this game. Would get this, yes!. She is awesome

Push Pull - Achievements and Quality of Life Update:

In response to player feedback the following updates have been implemented.

- **Steam Achievements** - 9 Steam Achievements have been added including some secrets to be found.
- **Windowed Mode** - You can now press "F4" to toggle between Fullscreen and Windowed mode. You can resize the window by dragging the border and aspect ratio is maintained.
- **Non-QWERTY Support** - There is now a controls file for non-QWERTY keyboard users. The file is located at "C:\Users\YOURPROFILE\AppData\Roaming\Push_Pull__Steam_\controls.txt". You will need to update and load the game once before it is visible. Follow the instructions inside to customise your controls. I may look to add this in-game based on player feedback.

If you have any issues you can always contact me at absolution.dev@gmail.com

Thanks for playing,

absolution
